# 057 HS

Most car manufacturers now offer vehicles utilizing high security type key blades. With this rapid movement toward the exclusive use of this type of locking system, the 057 HS provides an economical solution for duplicating these keys.

The number of vehicle makes and models featuring this style of key grows annually. You now find these keys used by General Motors, Ford, Chrysler, Honda, Toyota, Volkswagen, Hyundai, Lexus, Mazda and many more.

To stay up-to-date in automotive key duplication, you need the 057 HS Performance Series. With a modest price point, and the much higher re-sell price\* of the keys you will quickly offset the purchase price of this key machine and add a surprisedly profitable key duplication service.

- **Designed specifically for duplicating internal and external track, "laser", "sidewinder" style high security automotive keys (includes 2-track and 4-track versions)**

\* \$60 or more based on national average.  
The actual resell price of an internal or external track style automotive key is influenced by local / geographic retail pricing and even more when a transponder chip is in the head of the key. There are certain keys that can cost in excess of \$200 for a duplicate.

\*\* Identified by having tumbler cuts on just one side of the key
